Subject: Re: Reference to 120 stream crossing and question

Glenn:

Thanks for sharing the report. How do we explain the difference between the 120 stream crossings described in Hauser and the 70 we cite in the BBA?

Here is Hauser.

He cites an NDM 2005 monitoring progress report as the source of the potential 120 crossings.

Subject: Reference to 120 stream crossing and question

Folks:

I knew that I had seen a reference to 120 stream crossings somewhere. The brief submitted by NRDC refers to a potential of 120 stream crossings for the transportation corridor on page 39. It sites a document by Hauser but does not include a full citation.

Our assessment says 70 stream crossings. Is that the total number of crossings for the total length of the transportation corridor or is that just the total for the segment within our two watersheds of focus?

-P
